CUSTOMIZED TRAINING

Georgia Department of Public Health
East Central Health District
CUSTOMIZED TRAINING SURVEY

• A survey of ten questions was sent out to participants prior to the training to determine areas that needed to be addressed.

• Results were lowest score 40%
• Median score 80%
• Highest score 100%
DESIGNING THE TRAINING

• The questions were designed around what we thought they should know.
• Now to develop the training program to answer these questions.
• We gave general information they could pass on to their clients in the WIC Program.
MOSQUITO LIFE CYCLE
MOSQUITO LARVAE

Best time to kill or effect hormones to keep from adulthood
EMERGING ADULT

Hardest to kill in this stage.
Truck spraying is least effective and most expensive
MOSQUITO PROBOSIS
**BREEDING SITES**

**Mosquito Breeding Site**
Note that the end of the corrugated pipe is supported at the end, thus trapping water where mosquitoes will breed.

**Mosquito Breeding Site**
This trough has been placed backwards to avoid erosion, however it retains enough water to breed mosquitoes.

**Good Idea**
This drain pipe is angled downwards, allowing all the water to drain out.

MOSQUITO DISEASES

- West Nile Virus
- Eastern Equine Encephalitis
- St. Louis Encephalitis
- Dog Heart Worm
- Dengue Fever
- Malaria
- Yellow Fever
- Chikungunya
- ZIKA Fever
DISEASE NOT CARRIED BY MOSQUITOES

HIV
MOST IMPORTANT TO YOU IS

• ZIKA Fever

• Young women and children are most effected by this disease.
• As of July 17, 2017
• 1,997 women with lab evidence of ZIKA. US
• 88 live born infants with birth defects
• 8 pregnancy losses with birth defects
• Birth defects can show up after birth
LOCAL EXAMPLE
WHAT’S THIS?
WHAT DID WE FIND?

154 *Aedes albopictus* larvae
**Aedes albopictus**

Life time flight range is 600 feet
WHAT DID WE FIND?

• 75 houses within the flight range

• 2.55 Persons per household

• 191 persons potentially exposed to diseases
WHAT CAN YOU DO?

• Ask them about mosquitoes and what they know.
• Hand out the ZIKA information.
• Explain that there is no vaccine for any mosquito borne disease except Yellow Fever
• Tell them about using condoms for 6 months if they or their partner have been to an area where ZIKA is active.
• Remind them about birth defects even after birth
WHAT CAN YOU DO?

• Assure the client that they should use a repellent containing DEET. Not suntan lotion or hearts of palm or other home remedies.
• The DPH handouts tells how to use these products.
• We cannot go to other counties but if you or they want more information feel free to contact us and we will be glad to help in any way we can.
• Thank you for your time and attention
The same survey was sent out to determine the success of the training.

Results were lowest score 60%
Median Score 100%
Highest score 100%
58 people took the pre survey.
52 people took the post survey.
WHAT TO DO NOW?

- Any answers below 90% need to be addressed.
- Changes were made in those questions.
- We are now ready to run the program with a different group to see if the changes that were made did make a difference.
THANKS TO

• Dr. Stephen Goggans
• Jonathan Adriano
• Doris Hart
