INSECTS

*using Dogs to help us find Inaccessible or
Small
Insects*

Dogs have an extraordinary olfactory sense and auditor

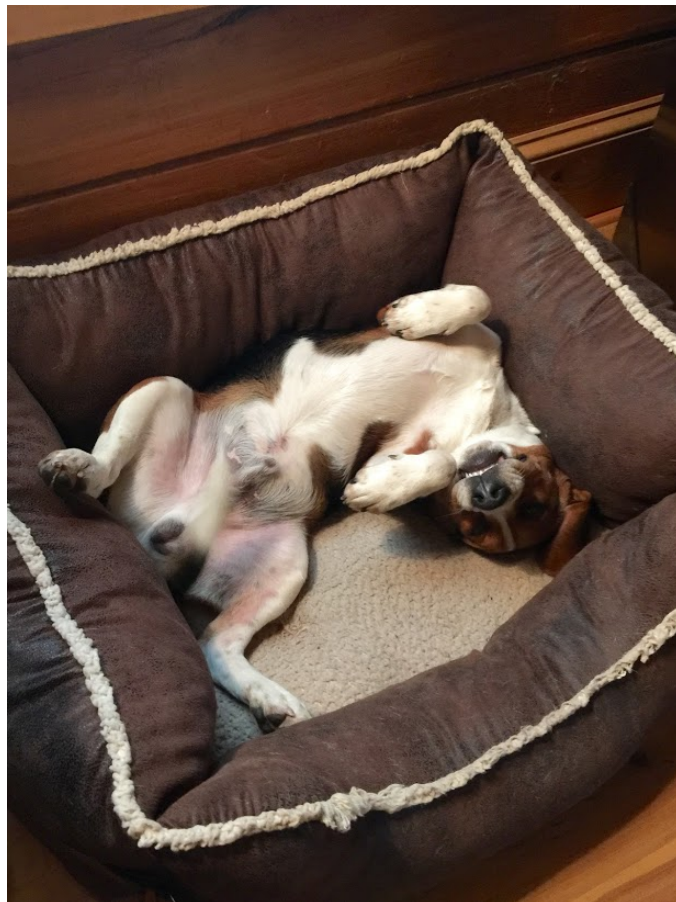

Formosan Termites have shown up in Georgia.

Their colonies are much larger than Native Sub-Termite and damage much fa

They create a carton nest inside the structure and the K9's are extremely helpf

We select pups at an early age and start behavior training

We introduce the dog to the insects and imprint the scent and sounds of that

We use positive and negatives and start getting responses for the positives and work and ignore the negative insects and or conditions.

Its like hide and seek for dogs with bugs. We make it a fun gamed the dogs love to play.

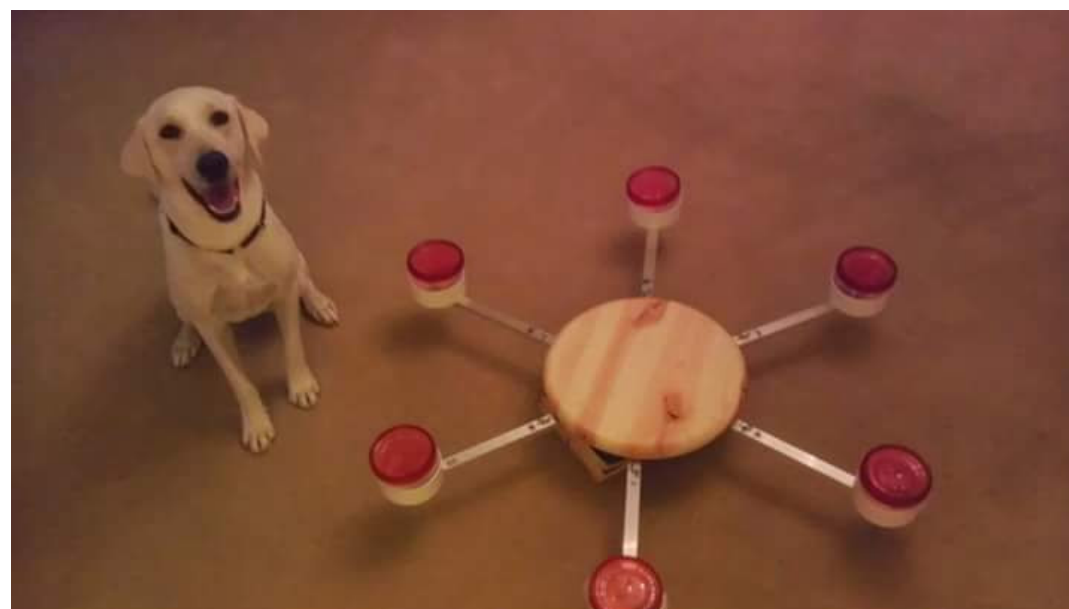

The dogs wants to please their handler. They also are given food reward

The dog goes home with the handler and becomes part of their family.

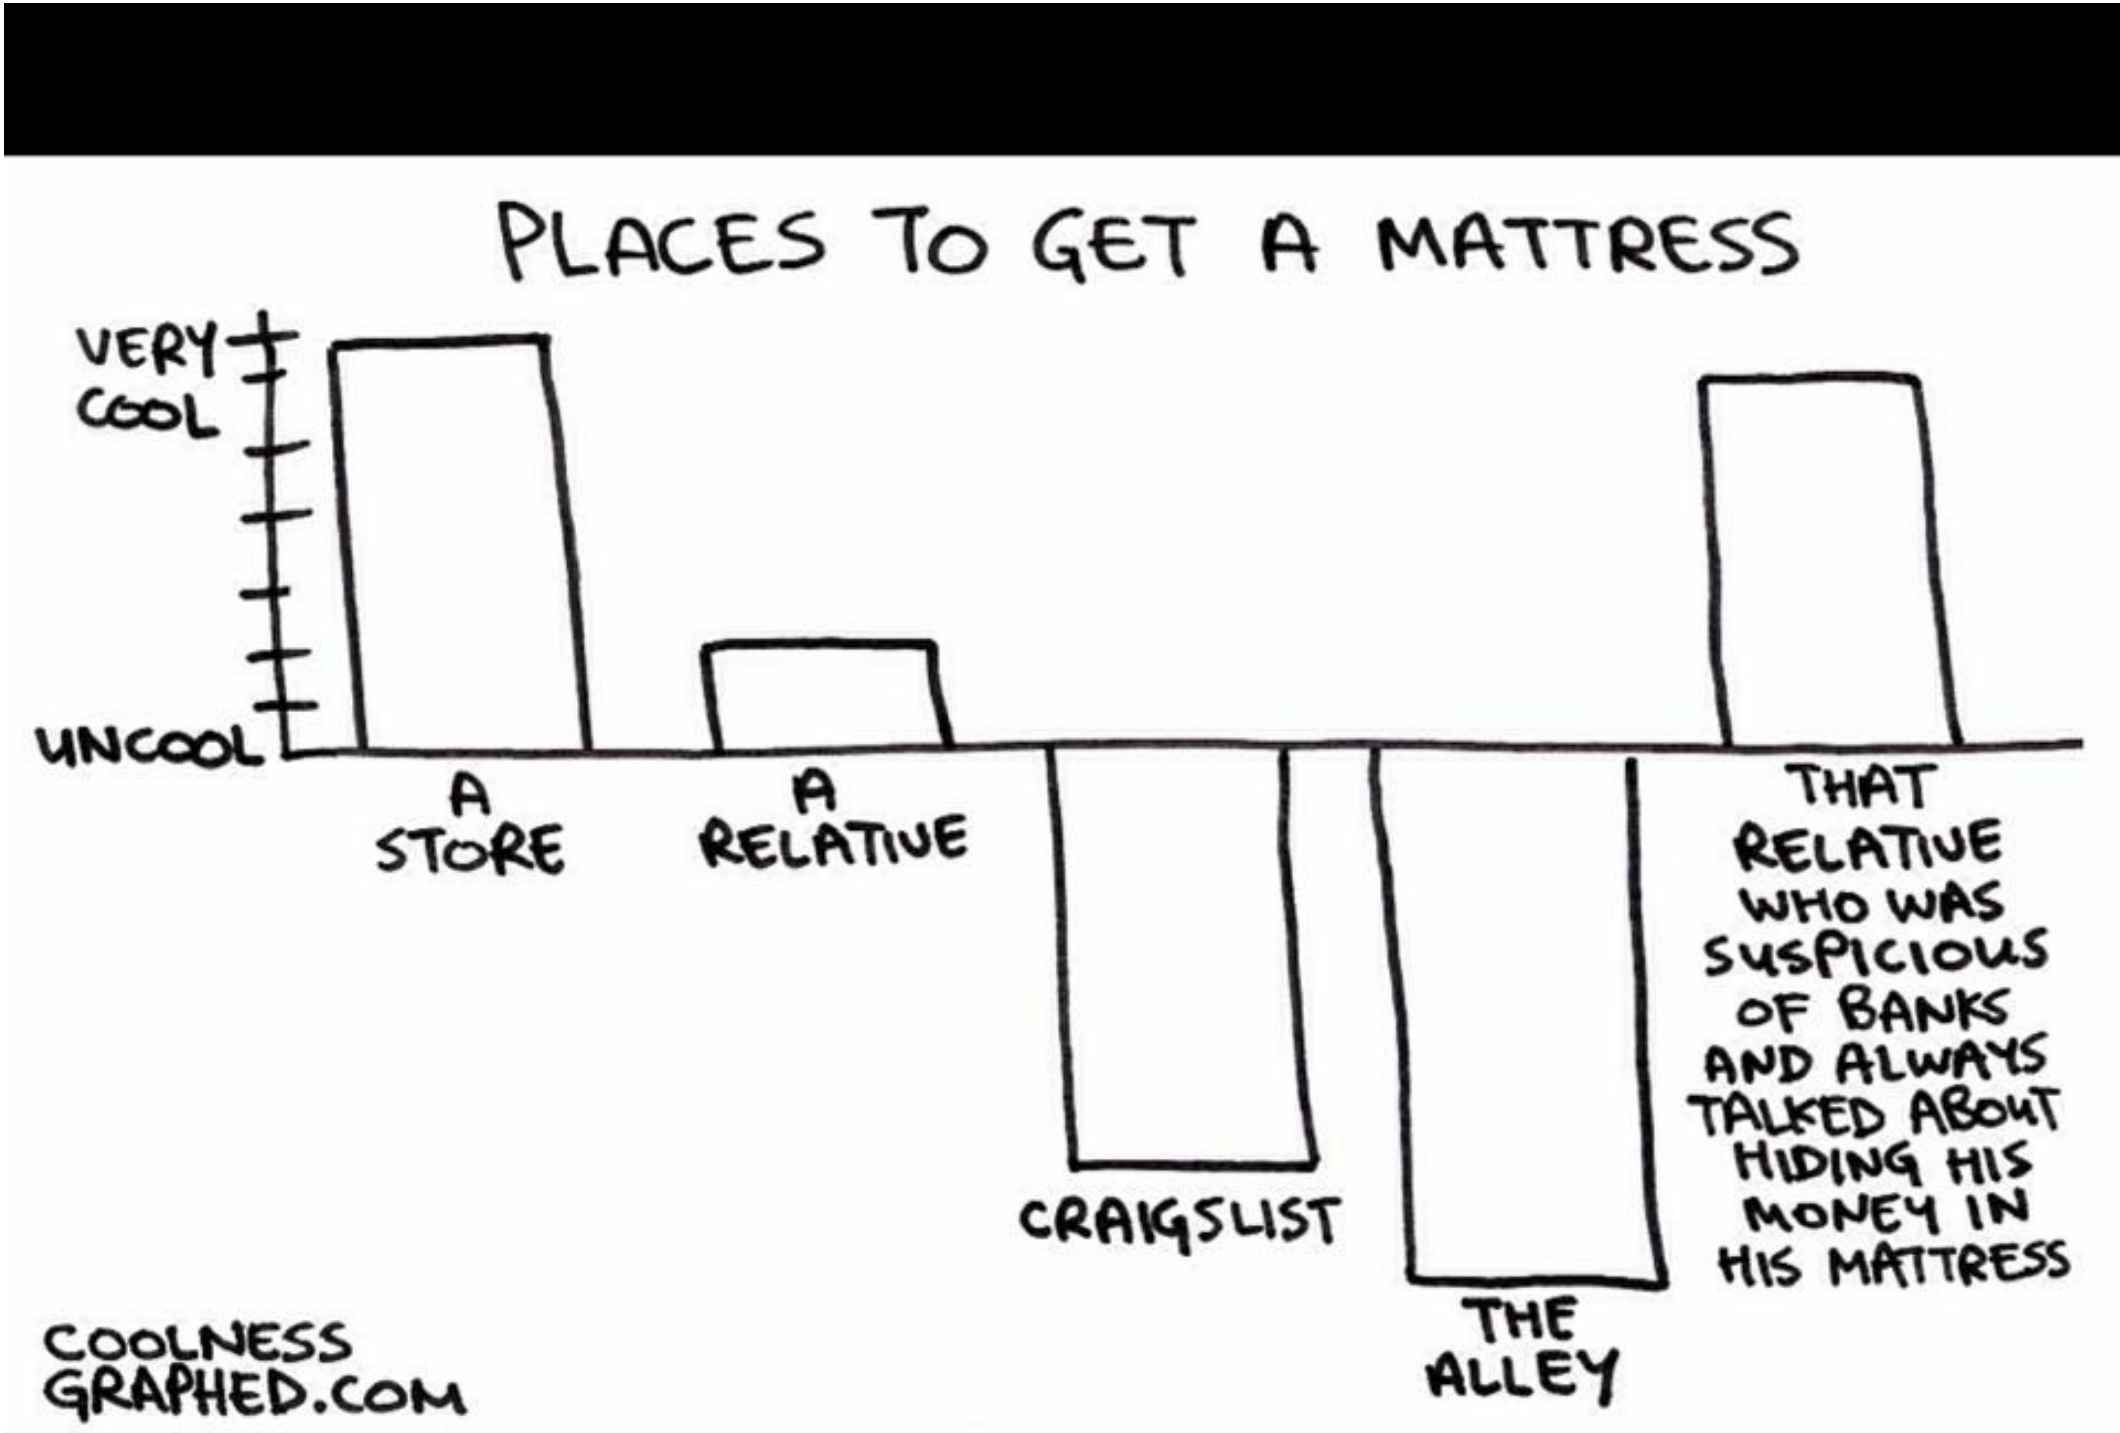

and on how to properly maintain the health and working efficiency of their partner. 2

and Bugs are both hard to find and the dogs are very helpful in locating them in ina

Bed Bugs have become a really big deal ! The dogs are the most efficient

Termites do more damage structures than fires and storms combined

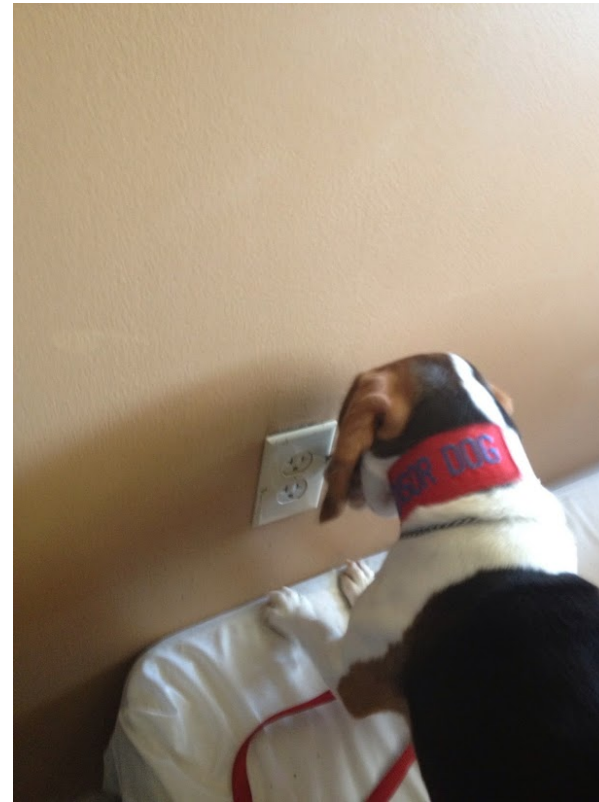

I handled the first Termite Detection Dog in Georgia back in 1984

Timmy the Termite Dog

I worked with him every day for 9 years.

*I also trained and handled Benny the Bed Bug Dog for 7 years every day.
It is a very rewarding and fun job.*
